Clinical Message Service Charter

A discovery based process to deploy a clinical results delivery service in rural Northern California by accomplishing the following interrelated tasks

1. Sign online service agreements with labs to deliver clinical results
2. Sign user agreements with practices to coordinate clinical result delivery
3. Align clinical results delivery to site level business processes
4. Build and operate a clinical results delivery infrastructure
5. Expand clinical results delivery service to more than 50% of ambulatory providers
6. Execute a sustainable business plan to transition away from grant funding
