Improve quality, safety, efficiency, and reduce health disparities	<ul style="list-style-type: none"> Provide access to comprehensive patient health data for patient's health care team Use evidence-based order sets and CPOE Apply clinical decision support at the point of care Generate lists of patients who need care and use them 	<ul style="list-style-type: none"> Use CPOE for all orders² Implement drug-drug, drug-allergy, drug-formulary checks Maintain an up-to-date problem list of current and active diagnoses based on ICD-9 or SNOMED 	<ul style="list-style-type: none"> 10% of all orders (any type) directly entered by authorizing provider (e.g., MD, DO, RN, PA, NP) through CPOE² Implement drug-drug, drug-allergy, drug-formulary checks Maintain an up-to-date problem list of current and active diagnoses based on ICD-9 or SNOMED 	<ul style="list-style-type: none"> Report quality measures to CMS including: <ul style="list-style-type: none"> % diabetics with A1c under control [EP] % hypertensive patients with BP under control [EP] % of patients with LDL under control [EP] % of smokers offered smoking cessation counseling [EP, IP] % of patients with recorded BMI [EP] % eligible surgical patients who receive VTE prophylaxis [IP] % of orders (for medications, lab tests, 	<ul style="list-style-type: none"> Use CPOE for all orders Use evidence-based order sets Manage chronic conditions using patient lists and decision support 	<ul style="list-style-type: none"> Use CPOE for all order types Use evidence-based order sets Record clinical documentation in EHR Generate and transmit permissible discharge prescriptions electronically Manage chronic conditions using patient lists and decision 	<ul style="list-style-type: none"> Additional quality reports using HIT-enabled NQF-endorsed quality measures [EP, IP] % of all orders entered by physicians through CPOE [EP, IP] Potentially preventable Emergency Department Visits and Hospitalizations [IP] Inappropriate 	<ul style="list-style-type: none"> Achieve minimal levels of performance on quality, safety, and efficiency measures Implement clinical decision support for national high priority conditions Medical device interoperability Multimedia support (e.g., x-rays) 	<ul style="list-style-type: none"> Clinical outcome measures (TBD) [OP, IP] Efficiency measures (TBD) [OP, IP] Safety measures (TBD) [OP, IP]

¹ The HIT Policy Committee recommends that incentives be paid according to an "adoption year" timeframe rather than a calendar year timeframe. Under this scenario, qualifying for the first-year incentive payment would be assessed using the "2011 Measures." The payment rate and phaseout of payments would follow the calendar dates in the statute, but qualifying for incentives would use the "adoption-year" approach.

² CPOE requires computer-based entry by providers of orders (medication, laboratory, procedure, diagnostic imaging, immunization, referral) but electronic interfaces to receiving entities are not required in 2011

³ Race and ethnicity codes should follow federal guidelines (see Census Bureau)

	<p>and technologies and compliance with applicable law.</p> <ul style="list-style-type: none"> Provide transparency of data sharing to patient. 	<u>Nationwide Privacy and Security Framework</u>	<u>Nationwide Privacy and Security Framework</u>			reporting, and research), where appropriate, so that important information is available with minimal privacy risk.		research), where appropriate, so that important information is available with minimal privacy risk.		<ul style="list-style-type: none"> Protect sensitive health information to minimize reluctance of patient to seek care because of privacy concerns. 		<p>treatment, payment, and health care operations, in compliance with applicable law.</p> <ul style="list-style-type: none"> Incorporate and utilize technology to segment sensitive data 	

Additional Notes:

1. While all process measures (e.g., CPOE adoption) apply to all eligible providers, applicability of quality or outcome measures to specialists will be defined in the rule-making process. In 2013, disease- and/or specialty-specific registries are included as objectives. Specific measures will be included in refinements to the 2013 recommendations.
2. Additional efficiency measures to consider for 2013 recommendations include: generic therapeutic substitutions for medications
3. NQF is working with measure developers to refine existing administratively defined quality measures referenced in this matrix to be redefined using clinical and administrative data from EHRs
