HealthBridge Profile

HealthBridge is a not-for-profit health information exchange serving in the Greater Cincinnati tri-state area. Our mission is to improve the quality and efficiency of healthcare in our community. To do this we serve as a trusted third party working with all participating healthcare stakeholders to facilitate creation of an integrated and interoperable community healthcare system. This includes the adoption of community standard technologies and work processes.

Our Health System participants . . .

- Cincinnati Children's Hospital Medical Center,
- The Health Alliance,
- Mercy Health Partners,
- St. Elizabeth Medical Center, and
- TriHealth

. . . include 18 hospitals and represent nearly 90% of the community's hospital sector activity.

HealthBridge also connect thousands of physicians and staff as well as nursing homes, independent labs, radiology centers and others in our healthcare community.

HealthBridge provides access to over 60 hospital based critical care systems including radiology images, fetal heart monitoring, hospital-based electronic medical records and chart completion, among others. Additionally, we operate the largest community-based secure clinical messaging system in the country. We function as a complete outsourced solution of results reporting for our hospitals and ancillary facilities. Through our clinical messaging system, we deliver over 1.4 million results (laboratory, radiology, transcription and ADT) to over 4,000 physicians EACH MONTH.
